Summary

Java Backend Developer with over 2 years of experience in designing, developing, maintaining and supporting data warehousing. Experienced in designing scalable and robust server-side applications using Java, Spring Boot, Maven, and Apache Tomcat. Expertise in big data technology such as Impala, HDFS, and Hue with hands-on expertise in performance optimization. Skilled at working with cross-functional teams to provide strong backend solutions that enhance user satisfaction and operational effectiveness. I am eager to contribute to the growth and success of the organization while continuously enhancing my own knowledge and skills.

Experience

10/2022 – PRESENT

Java Backend Developer | Tata Consultancy Services Ltd. | Thane, Maharashtra, India 400605

Client: Reserve Bank of India

Project Name: CIMS (Centralized Information Management System)

Technologies: Java, Spring Boot, MySQL, Hue, HDFS, Impala, Git

Description: CIMS is a centralized platform developed to manage and streamline large-scale data across departments. The system enables efficient information access, updates, and reporting through secure backend services.

Responsibilities:

- Independently developed a complete backend module in collaboration with a frontend developer, under the guidance of the technical lead.
- Designed and implemented RESTful APIs using Java and Spring Boot.
- Integrated and optimized database operations using MySQL.
- Worked with big data components like HDFS and Impala for large-scale data handling and querying.
- Followed Agile methodologies and contributed to sprint planning and code reviews.

Skills

- **Languages & Frameworks:** Java, Spring Boot, Maven, REST APIs,
- **Development Tools:** Apache Tomcat, Postman, Git
- **Database & Big Data:** MySQL, HDFS, Impala, Hue
- **Soft Skills:** Problem-Solving, Collaboration, Module Ownership, Communication
- **Concepts:** Object-Oriented Programming (OOPs), Microservices Architecture, Agile Methodology
